1. System requirements 2
1. Ranorex Studio Installation 4
3. Ranorex Extension 9
   a. Update existing Ranorex Extension 9
   b. Adding Ranorex Extension: 10
4. Installing Ranorex Remote Agent 10

1. System requirements

a. Please ensure that the PC or VM fulfils the following requirements:

Supported OS Versions	Windows Server 2019 standard Windows 10 Enterprise Windows Server 2016 standard Windows Server 2022
Oldest Chrome version supported	126.0.6478.183
Oldest Edge version supported	128.0.2739.42

b. **Preparation & Backup**

i. Ensure to take backup of TA solutions before opening any solution for Ranorex migration. Check if the backup solution is not corrupted and can be executed without any issues.

ii. Ensure to close all solution related applications like Ranorex studio, Ranorex spy, MS Excel and Ranorex agent.

2. MS Build Installation

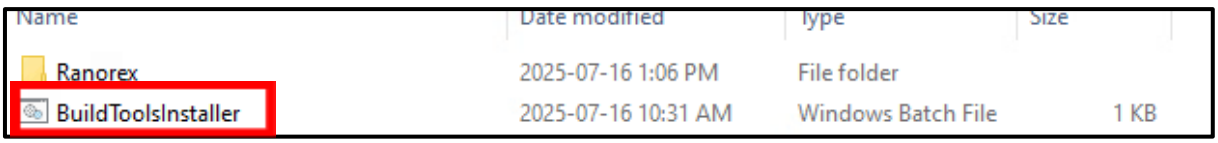

If the PC or VM has Internet access, MSBuild will automatically be updated to the correct version during the along with the prerequisite of the Ranorex installation. So, no action is required in this case.
But, if there is no Internet access, MSBuild installation is required before Ranorex installation. Please install MS Build according to the following steps:

i. The MS Build tools installer setup is found in the following locations:

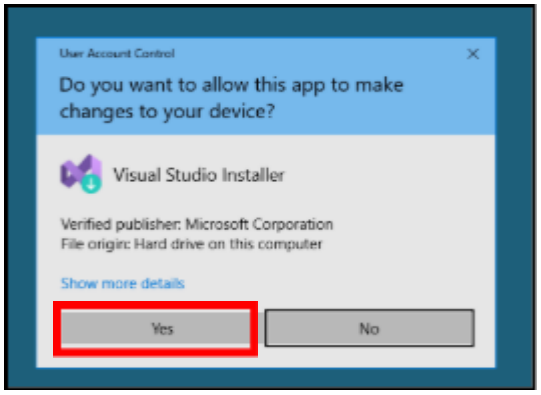

- \\DEKHER2FS021.de007.siemens.net\DCSplusST-BGL\50_TA\TA_RanorexSetup\Current\11.5.1\RanorexBuildToolsInstaller
- \\fs1\TestAutomation\TA_RanorexSetup\Current\11.5.1\RanorexBuildToolsInstaller

ii. Copy “BuildToolsInstaller.bat” file to your local machine (D:\).

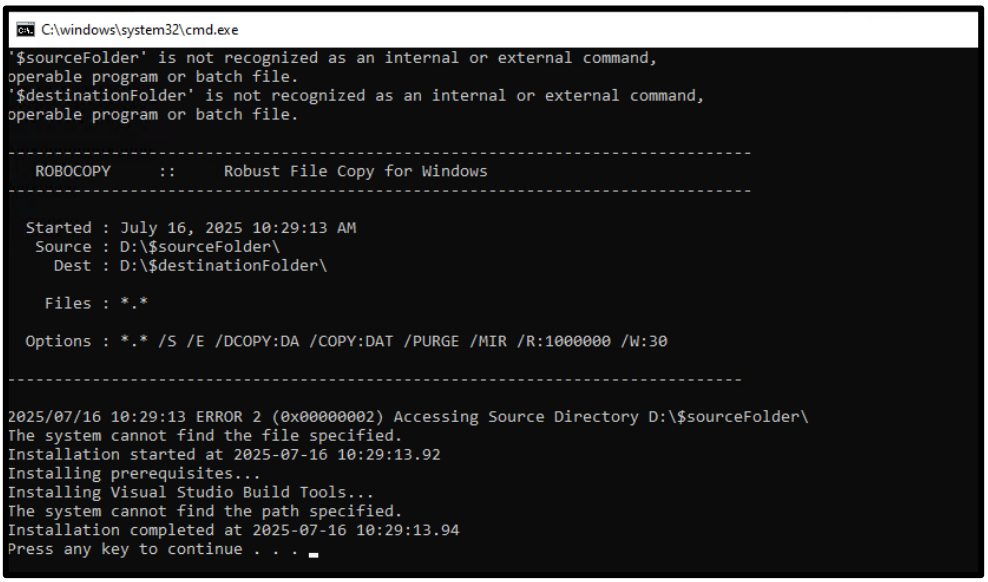

iii. Double click on “BuildToolsInstaller.bat” file or run as administrator. This will copy MSBuild file tools from file store to “C:\Ranorex” folder and complete the build tools installation.

ii. Click on “Yes” button as shown below if popup appears:

iii. Wait till installation is completed.

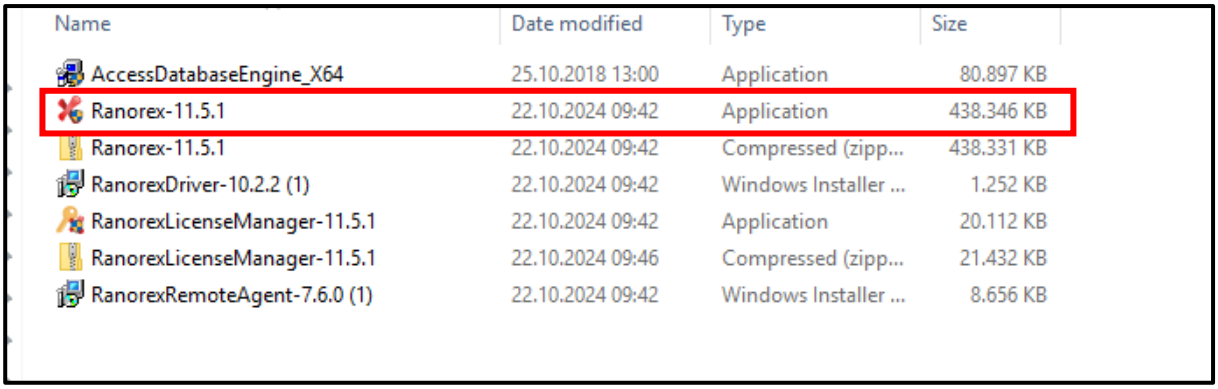

Now, the system is ready with Ranorex pre-requisites. Proceed with Ranorex setup installation.

1. Ranorex Studio Installation

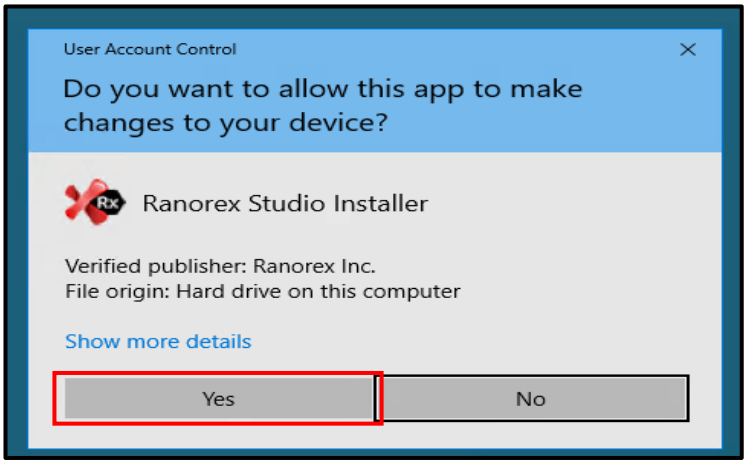

i. The Ranorex setup is found in the following locations:

- \\DEKHER2FS021.de007.siemens.net\DCSplusST-BGL\50_TA\TA_RanorexSetup\Current\11.5.1
- \\fs1\TestAutomation\TA_RanorexSetup\Current\11.5.1

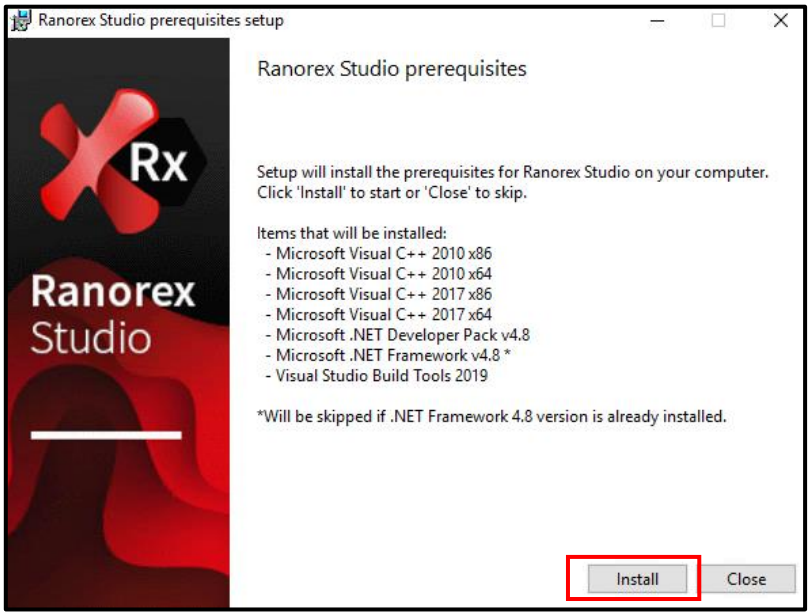

ii. Execute setup file with administrator rights.

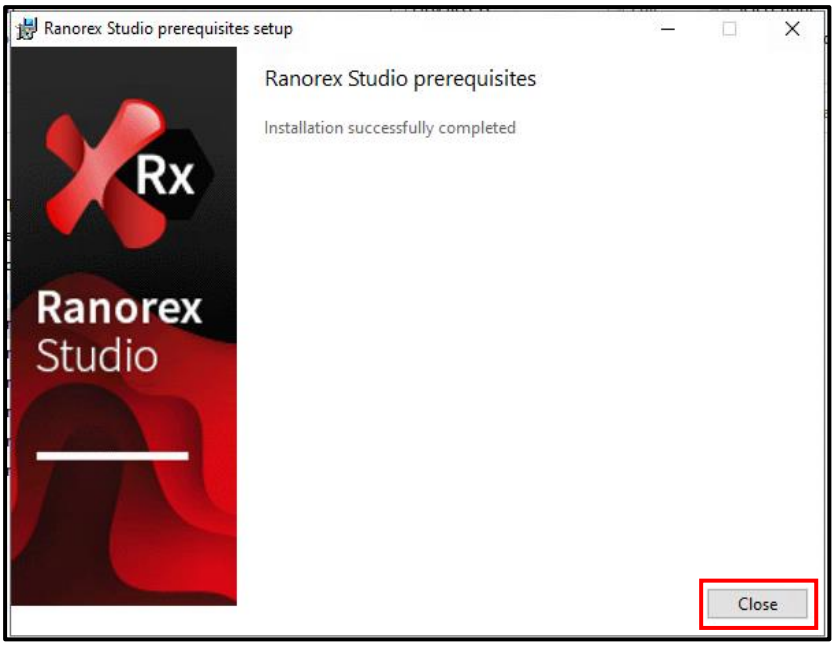

iii. Click on “Yes” button.

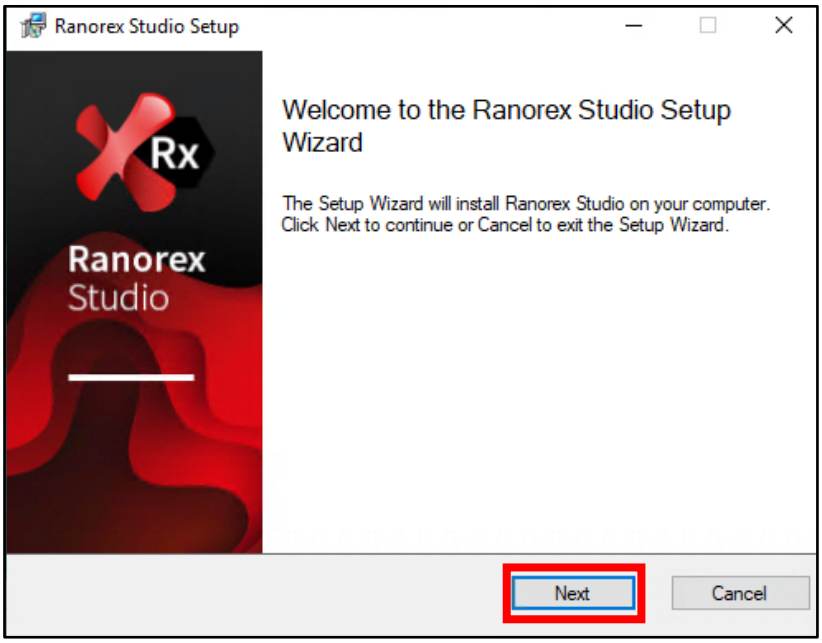

iv. Click on “Install” button and wait till the processing is completed.

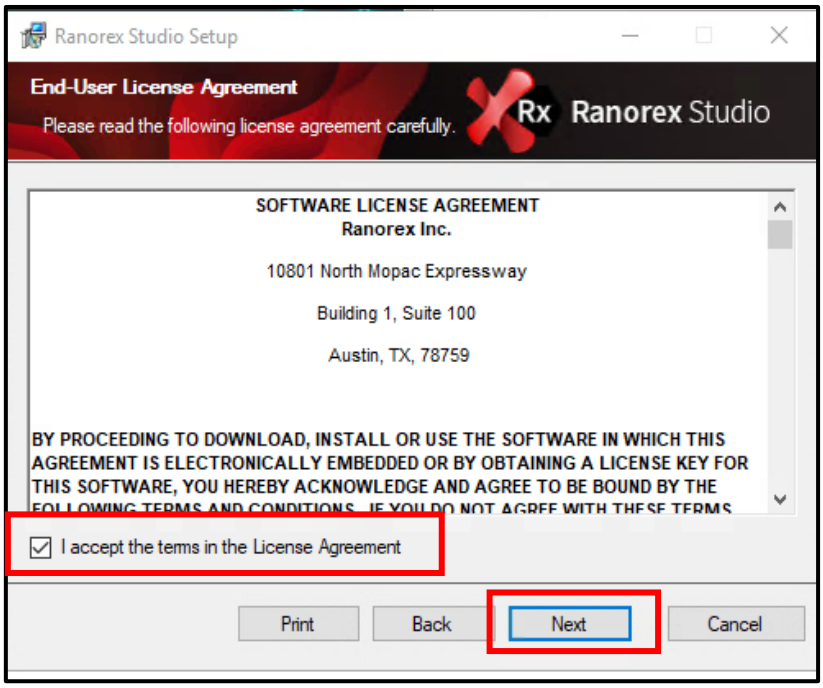

v. Once prerequisites installation is successful click on “Close” button.

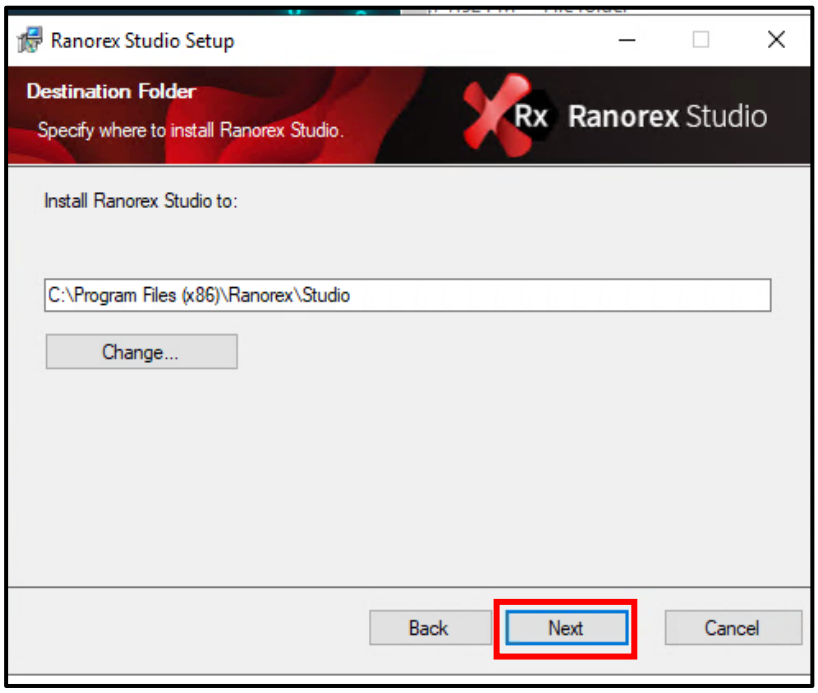

vi. Click on “Next” button.

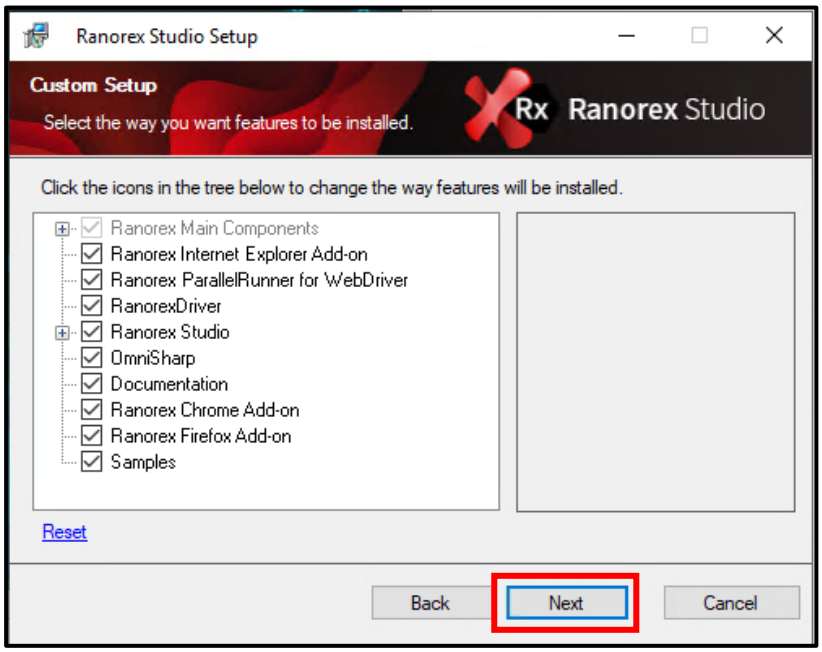

vii. Accept the license terms & conditions and click on “Next” button.

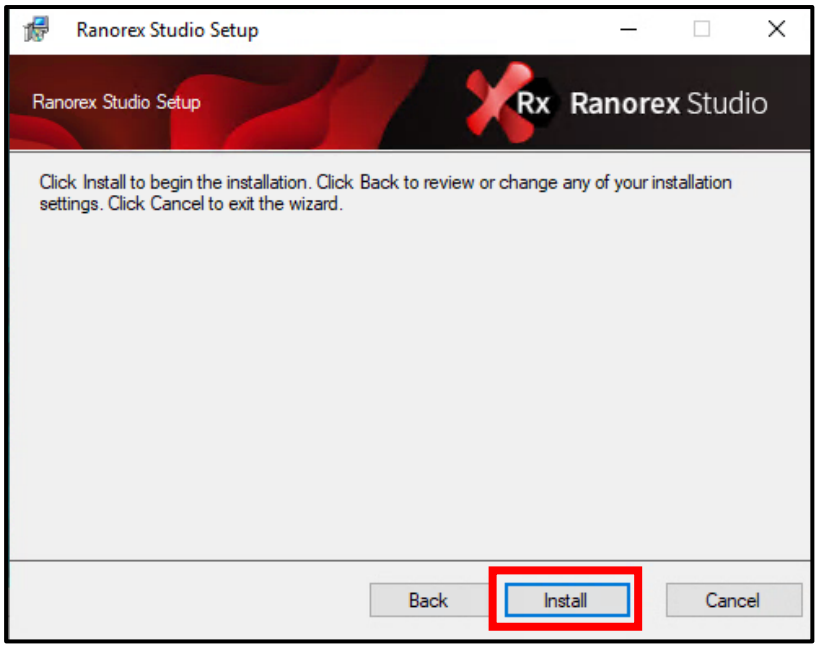

viii. Click on “Next” after ensuring Ranorex studio installation path.

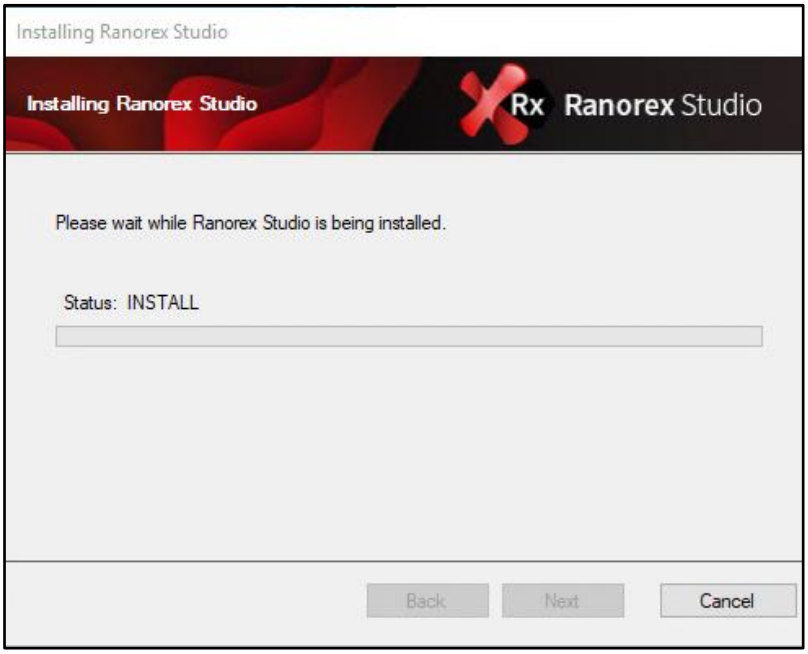

ix. Select all the required component for installation and click on “Next”.

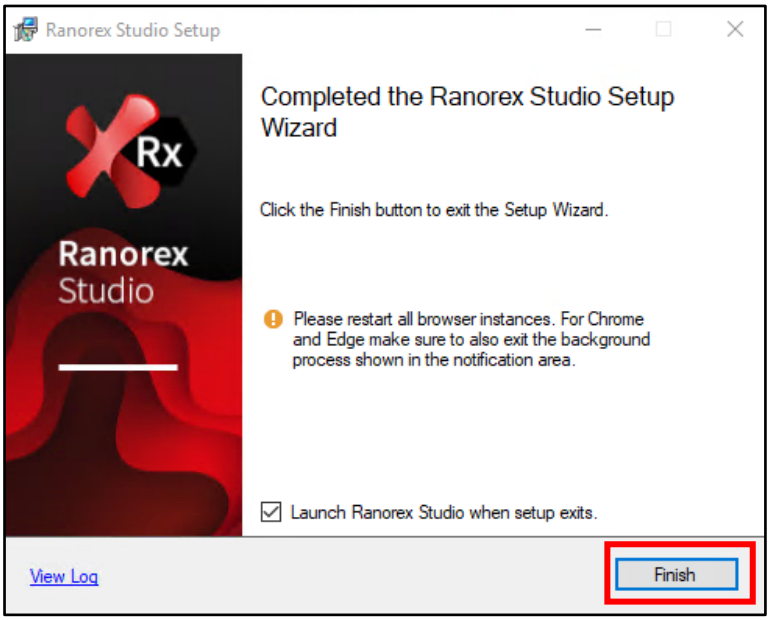

x. Click on “Install” button.

xi. Wait till installation is completed.

xii. Click on “Finish” button.

3. Ranorex Extension

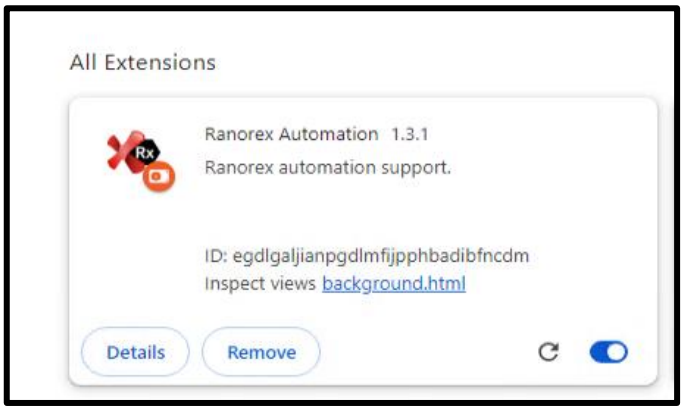

a. Update existing Ranorex Extension

If your system had previously installed Ranorex, for updating already added extension in respective browser (chrome/MS Edge), please follow below procedure:

I. Open browser (chrome/MS Edge) with admin rights.

II. Navigate to Extensions → Manage extensions → Click on refresh button for Ranorex Automation 1.3.1 extension and ensure that it is updated to 1.5.0.

III. Kindly note that only one browser (chrome/MS Edge) extension should be enabled at a time.

b. Adding Ranorex Extension:

If you are installing Ranorex for the first time, the extension won't be available in the browser.

I. Ensure all browser instances are closed (Chrome, MS Edge, IE)

II. Open browser (Chrome,MS Edge) with admin rights

III. Navigate to web browser's manage extensions then, ensure "Developer mode" is enabled and add Chrome extension (C:\Program files(x86)\Ranorex\Studio\Ranorex Chrome extension).

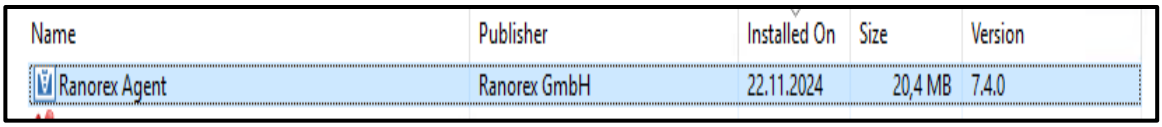

IV. Ensure added extension is enabled (Only one browser support at a time).

V. If facing error while adding extension then, remove following entries from Registry editor:

- Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\ExtensionInstallForcelist
- Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\ExtensionInstallAllowlist
- Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Google\Chrome\ExtensionInstallWhitelist

4. Installing Ranorex Remote Agent

i. If Migrating from Ranorex 10.1.7 to 11.5.1, please close all instances of Ranorex agent 7.4.0 and uninstall Ranorex agent 7.4.0 from control panel.

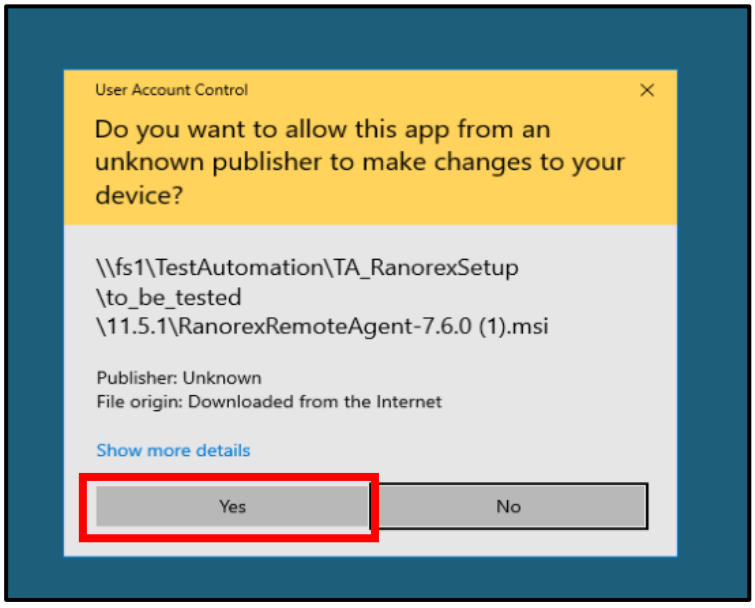

ii. Start Ranorex Remote Agent 7.6.0 from Installation Path :

- \\DEKHER2FS021.de007.siemens.net\DCSplusST-BGL\50_TA\TA_RanorexSetup\Current\11.5.1
- \\fs1\TestAutomation\TA_RanorexSetup\Current\11.5.1

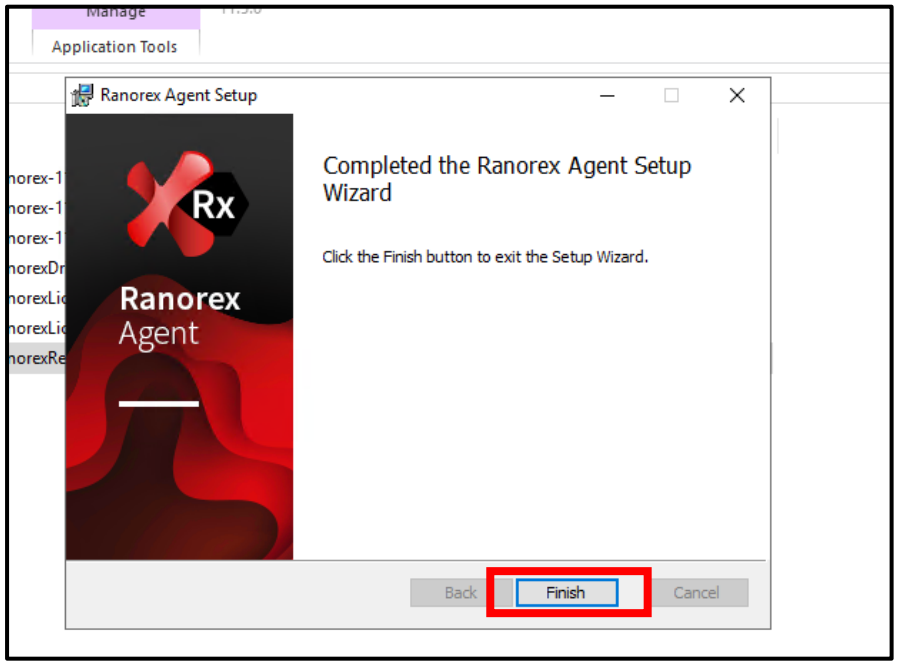

iii. Accept the terms in the License agreement by checking the checkbox. Click on "Install" button.

iv. Click on “Yes” button.

v. Click on “Finish” button.

vi. Ensure that Ranorex Chrome extension 1.5.0 is added in browser (Chrome/MS Edge)
